Ec151.03 Statistics MWF 10 Fulton 115 Spring 2000 Boston College

Jaana-Marja Muurinen Office: Carney 243, x4514, Muurinen@bc.edu Office Hours: Wednesdays 1:10-1:50 p.m., Mondays and Fridays 11:00-11:50 a.m. and by appointment

TEXT: Triola, Mario F. and LeRoy A. Franklin: **Business Statistics**, Addison-Wesley, latest edition.

Introduction

This course is an introduction to probability theory and statistics for economics and management students. Its objectives are to acquaint the students with : a) statistical inference and the basic concepts used in probability theory and statistics, b) statistical problem solving, and c) the basics of computerized data analysis.

The work in the course consists of lectures, homework problems (based on problems in the text) and some computer assignments. Testing takes the form of three examinations (two during the term and one final examination), 5-7 preannounced quizzes on the homework problems, and at least one graded computer assignment.

Because of the quizzes, the homework problems do not have to be handed in and are not graded (although you are welcome to see me about them during the office hours). The computer assignments will be discussed in a later handout. These assignments are to be handed in.

Statistics is an inherently cumulative discipline: concepts studied early in the course are still needed in the final sections. This means that you should not plan to leave the work until the night before the exam! Doing the homework problems regularly is a good way to make sure that you keep up with the material.

Examination Schedule and Grading Policy

Your course grade depends on two in-term examinations, the final examination, the computer assignments and the quizzes. The in-term examinations are each worth 25%, the final exam 30%, and the computer assignments 10%. The remaining 10% is the total weight of the quizzes.

The dates of the quizzes will be preannounced at least one week in advance. The in-term examination dates are likely to fall on or near the following dates: First in-term exam: 2/18/2000 Second in-term exam: 3/29/2000

The due dates of the computer assignments will be given at a later date. The final examination will be held on 5/12/2000. Let me know as soon as possible if the midterm dates clash with your general schedules.

Make-up examinations for in-term examinations may be given a) in the case of a temporarily incapacitating illness (a note from a health care practitioner is needed), b) if the examination is missed because of an absence for religious reasons as described in the Undergraduate Catalog, provided that I am informed about this prior to the scheduled examination date. Make-ups may also be arranged for reasons of 'severe life-events'. A letter of support from the relevant dean is required.

All students in this course are expected to follow Boston College's code of academic integrity. In particular, collaboration is not allowed in the examinations, quizzes or graded computer assignments, and all students must be the true authors of any work they submit.

Course Outline and Assigned Readings in the Text

DATE TOPIC	CHAPTERS T	O STUDY		
1/19-1/21 I. Introd	uction 1			
C. Measures		2.1-2.4, 2.8		
III. Introduction to Probability Theory				
2/4-2/9 A. Basic Tool	s Defining the Concepts Probability Rules Permutations & Combinations	3.1-3.2 3.3-3.5 3.6		
2/11/-2/16 C. Discrete Probability Distributions Discrete Random Variables, 4.1-4.3 their Probability Distributions, Expected Values and Standard Deviations The Binomial Probability 4.4-4.5 Distribution				
First In-Term Examination 2/18/00 (Chs. 1-4)				
2/21-2/28 D.	The Normal Distribution			

The Standard Normal Distribution	5.1-5.2
Nonstandard Normal Distributions	5.3-5.5
Continuity Correction	5.6
The Central Limit Theorem 5.	7
(omit section 5.8)	

IV. Statistical Inference

3/1-3/3,	B. Estimation				
3/13-3/15	Introduction 6.1	6.2			
	Estimating the Population Mean	6.2			
	Estimating the Population 6.3				
	Proportion				
	Estimating the Population Variance 6.4				
3/17-3/27 C.	3/17-3/27 C. Hypothesis Testing				
	Basic Methods 7.1				
	Tests about the Mean	7.2-7.4			
Second In-Te	rm Examination 3/29/00 (Chs. 5-7.4)				
3/31-4/5	Tests about the Proportion 7.5				
	Tests about the Variance 7.6				
4/7-4/12 D.	Inferences from Two Samples				
	Introduction	9.1			
	Comparing Two Variances	9.2			
	Comparing Two Means	9.3			
	Comparing Two Proportions	9.4			
	Simple Linear Regression	10.1			
4/26-4/28	Introduction	12.1			
	The Simple Linear Regression	12.2-12.3			
	Model	10 1 10 5			
Estimation, Testing		12.4-12.5			
	and Prediction	12 (
	Correlation	12.6			

5/1 Review

ASSIGNED PROBLEMS:

You should work on the assigned problems during the same week as the related material is discussed in class. As an example, we plan to discuss Chapter 4 during 2/11-2/16. Thus, you should work on the problems for Ch. 4 from the following list during that same week. In general, try to do the problems in the order they are listed below. Short answers are given in the back of the textbook. See me during my office hours for longer explanations.

Chapter	Section	Problem Numbers
1	1.2	1, 3, 5, 11, 13, 15, 21
	1.3	1, 5, 11, 13, 15, 17
2	2.2	1, 5, 9, 13, 17, 25, 27
	2.3	3, 7, 11, 13
	2.5	1, 7, 13, 17
	2.6	1, 9, 11, 17, 19, 21
	2.7	3, 11, 37
	2.8	17
3	3.2	1, 3, 7, 19, 25
	3.3	1, 5, 21, 23
	3.4	1, 3, 11, 21, 23
	3.6	1, 3, 5, 7, 9, 15, 21, 27, 35, 39
4	4.2	1, 9, 11, 19
	4.3	1, 11, 13, 15, 17
	4.4	1, 3, 5, 9, 15, 23
	4.5	1, 3, 7, 19, 27
5	5.2	1, 5, 7, 11, 15, 23, 35, 37, 43, 45, 51
	5.3	9, 17, 25
	5.4	11, 15
	5.5.	1, 3, 5, 7, 9, 11, 17, 27
	5.6	11, 23
	5.7	1, 5, 15, 19
6	6.2	1, 3, 5, 9, 13, 17, 19,
	23, 27	
	6.3	1, 3, 5, 7, 13, 27
	6.4	1, 3, 5, 11, 19
7	7.2	1, 3, 5, 7, 9, 13, 25, 31

	7.3 7.4 7.5 7.6	1, 3, 5, 23, 27 1, 3, 13, 21 1, 5, 13, 17 1, 5, 13, 19
9	9.2 9.3 9.4	3, 7, 9, 17, 19 1, 5, 9, 11, 21, 23 1, 3, 11, 13, 19
12	12.2 12.3 12.4 12.5 12.6	1, 3, 7, 11, 21 1, 3, 7, 13 3, 7, 13, 19 5, 9 3, 5, 7, 19, 21, 23, 29
