Purpose of Course: This course provides an intensive overview of the field of economic growth and development. The course is designed primarily for economics majors, but is also appropriate for international studies, business, history, or political science majors seeking a comprehensive understanding of both theoretical and empirical aspects of growth and development. We will study the underlying determinants of economic growth, including factor accumulation and technological progress. We also will explore the extent to which political and social institutions influence the process of economic development. Our overriding goal will be to explain why some countries experience rapid increases in their standard of living while others do not. A central feature of our discussion will be the role policy plays in affecting economic success or failure across countries. Given the comprehensive coverage of the course, the workload is heavy and expectations for students are high.

Prerequisites: Students will have successfully completed EC 131-132, Principles of Economics and EC 201-202 (or 203-204), Intermediate Micro and Macro Economics.

Office Hours: I will hold office hours on Tuesday and Thursday afternoons from 2:00 to 3:00 in room 485 of 21 Campanella Way. You are welcome to make an appointment for other times. My office phone number is 552-3688 and my e-mail address is murphyro@bc.edu.

Texts:

Economic Growth, second edition, by David N. Weil, Pearson Addison-Wesley, 2009, available at the BC Bookstore. This book provides a thorough coverage of the theory and empirics of economic growth. In addition, Addison-Wesley Publishers has a web site that accompanies the Weil textbook, http://www.aw-bc.com/weil/, on which you will find some useful materials. I encourage you to explore the site. On the site you will find some very useful lab exercises that will help you learn about cross-country data and enhance your understanding of important concepts.

Problem Sets: I will assign problem sets that are drawn from the problems at the ends of chapters of the Weil textbook. Answer keys will be posted on the course website. These problems are to be handed in and will be graded on a pass/fail basis.
Current Economic News: Frequently, I will hand out or direct you to additional readings on current international policy issues. I may also post materials on the course web page, which you will find on my homepage: http://www2.bc.edu/~murphyro. I encourage you to follow current international development issues by reading on a daily basis one of the major national newspapers (e.g., The Wall Street Journal, The New York Times, and The Washington Post). Fortune, The Economist, and Business Week magazines are also good sources for keeping up on economic events. We frequently will discuss in class the relevant economic news of the day.

Grading: Your grade for the course will be based on a mid-term exam (40%) to be given on THURSDAY, OCTOBER 29 in class, a scheduled final exam (60%) to be given on THURSDAY, DECEMBER 17 at 9:00 A.M. Makeup exams will not be given. If you must miss the mid-term exam (but only with an excuse ahead of time), all of your grade will be based on the final exam. Attendance in class is mandatory and class participation, along with performance on problem sets, will be used to adjust grades up or down by half a grade level.

Course Outline

Part I. Introduction and Overview

1. The Facts to Be Explained and a Framework for Analysis
   Weil, Chapters 1 and 2.

Part II. Factor Accumulation

2. Physical Capital
   Weil, Chapter 3

3. Population and Economic Growth
   Weil, Chapters 4 and 5.

4. Human Capital
   Weil, Chapter 6.

Part III. Productivity

5. Measuring Productivity
   Weil, Chapter 7.

6. The Role of Technology in Growth
   Weil, Chapter 8.
7. Explaining Technological Change
   Weil, Chapter 9.

8. Productivity, Technology and Efficiency
   Weil, Chapter 10.

9. International Openness and Economic Growth
   Weil, Chapter 11.

*******MIDTERM EXAM THURSDAY, OCTOBER 29, IN CLASS*******

Part IV. Fundamentals Behind Economic Growth

10. Government Policies
    Weil, Chapter 12.

11. Income Inequality and Economic Development
    Weil, Chapter 13.
