The contents of the supporting files (programs, datasets, and help files) may be copied or reproduced by any means whatsoever, in whole or in part, as long as any copy or reproduction includes attribution to both (1) the author and (2) the Stata Journal.

The articles appearing in the Stata Journal may be copied or reproduced as printed copies, in whole or in part, as long as any copy or reproduction includes attribution to both (1) the author and (2) the Stata Journal.

Written permission must be obtained from StataCorp if you wish to make electronic copies of the insertions. This precludes placing electronic copies of the Stata Journal, in whole or in part, on publicly accessible web sites, file servers, or other locations where the copy may be accessed by anyone other than the subscriber.

Users of any of the software, ideas, data, or other materials published in the Stata Journal or the supporting files understand that such use is made without warranty of any kind, by either the Stata Journal, the author, or StataCorp. In particular, there is no warranty of fitness of purpose or merchantability, nor for special, incidental, or consequential damages such as loss of profits. The purpose of the Stata Journal is to promote free communication among Stata users.

The *Stata Journal*, electronic version (ISSN 1536-8734) is a publication of Stata Press. Stata and Mata are registered trademarks of StataCorp LP.

**The Stata Journal** publishes reviewed papers together with shorter notes or comments, regular columns, book reviews, and other material of interest to Stata users. Examples of the types of papers include 1) expository papers that link the use of Stata commands or programs to associated principles, such as those that will serve as tutorials for users first encountering a new field of statistics or a major new technique; 2) papers that go “beyond the Stata manual” in explaining key features or uses of Stata that are of interest to intermediate or advanced users of Stata; 3) papers that discuss new commands or Stata programs of interest either to a wide spectrum of users (e.g., in data management or graphics) or to some large segment of Stata users (e.g., in survey statistics, survival analysis, panel analysis, or limited dependent variable modeling); 4) papers analyzing the statistical properties of new or existing estimators and tests in Stata; 5) papers that could be of interest or usefulness to researchers, especially in fields that are of practical importance but are not often included in texts or other journals, such as the use of Stata in managing datasets, especially large datasets, with advice from hard-won experience; and 6) papers of interest to those teaching, including Stata with topics such as extended examples of techniques and interpretation of results, simulations of statistical concepts, and overviews of subject areas.

For more information on the Stata Journal, including information for authors, see the web page

<http://www.stata-journal.com>

The Stata Journal is indexed and abstracted in the following:

- Science Citation Index Expanded (also known as SciSearch®)
- CompuMath Citation Index®

**Subscriptions** are available from StataCorp, 4905 Lakeway Drive, College Station, Texas 77845, telephone 979-696-4600 or 800-STATATA-PC, fax 979-696-4601, or online at

<http://www.stata.com/bookstore/sj.html>

#### **Subscription rates:**

Subscriptions mailed to US and Canadian addresses:

3-year subscription (includes printed and electronic copy)	\$165
2-year subscription (includes printed and electronic copy)	\$115
1-year subscription (includes printed and electronic copy)	\$ 59
1-year student subscription (includes printed and electronic copy)	\$ 35
1-year university library subscription (includes printed and electronic copy)	\$ 75
1-year institutional subscription (includes printed and electronic copy)	\$175

Subscriptions mailed to other countries:

3-year subscription (includes printed and electronic copy)	\$240
2-year subscription (includes printed and electronic copy)	\$165
1-year subscription (includes printed and electronic copy)	\$ 84
3-year subscription (electronic only)	\$160
1-year student subscription (includes printed and electronic copy)	\$ 59
1-year university library subscription (includes printed and electronic copy)	\$ 95
1-year institutional subscription (includes printed and electronic copy)	\$195

Back issues of the Stata Journal may be ordered online at

<http://www.stata.com/bookstore/sj.html>

The Stata Journal is published quarterly by the Stata Press, College Station, Texas, USA.

Address changes should be sent to the Stata Journal, StataCorp, 4905 Lakeway Drive, College Station TX 77845, USA, or email [sj@stata.com](mailto:sj@stata.com).

## Articles and Columns 147

Improved generalized estimating equation analysis via xtqls for quasi-least squares in Stata.....J. Shults, S. J. Ratcliffe, and M. Leonard	147
Maximum likelihood and two-step estimation of an ordered-probit selection model .....R. Chiburis and M. Lokshin	167
Two postestimation commands for assessing confounding effects in epidemiological studies ..... Z. Wang	183
Estimation of nonstationary heterogeneous panels ..... E. F. Blackburne and M. W. Frank	197
QIC program and model selection in GEE analyses.....J. Cui	209
predict and adjust with logistic regression.....M. L. Buis	221
Making regression tables simplified ..... B. Jann	227
Review of A Handbook of Statistical Analyses Using Stata, Fourth Edition, by Rabe-Hesketh and Everitt ..... W. D. Dupont	245
Speaking Stata: Identifying spells.....N. J. Cox	249

## Notes and Comments 266

Stata tip 44: Get a handle on your sample.....B. Jann	266
Stata tip 45: Getting those data into shape ..... C. F. Baum and N. J. Cox	268
Stata tip 46: Step we gaily, on we go ..... R. Williams	272
Stata tip 47: Quantile-quantile plots without programming.....N. J. Cox	275

## Software Updates 280
