EC 329: Experimental Decision Theory
Spring 2001

Instructor Uzi Segal, Room 246 Carney Hall.

Phone x21567.

E-mail segalu@bc.edu

Lectures Tuesdays 4:30–7:00, Gasson 305.

Office Hours Tue 3:30–4:30 if there is a lecture on this day, or by appointment.

Readings There is a huge body of literature regarding experimental decision theory. Occasionally, I will refer you to some relevant articles.

Grades There will be one midterm, on Feb. 27. Its weight will be 35% of the final grade. There will be a final exam (date yet unknown), and its weight will be 50% of the final grade. *You have to attend all exams.* If you know in advance that you will not be able to take any of them, come and see me as early as possible. If you do not take an exam and you do not have a just reason, your grade for that exam will be zero. If you take an exam, its grade, whatever it is, will not be waived.

There will be five problem sets, for which you'll get 15% (see below). There will be a final exam, its

Homework There will be 5 problem sets. You have to solve and submit all of them. You'll get 3 points for each submitted set, provided you answered at least half of it. You have to submit each problem set one week after the day it was circulated.
