

BOSTON COLLEGE
Department of Economics

Ec. 380.01
Capital Markets
Fall, 2004
Carney 104, T,Th., 10:30

Harold Petersen
21 Campanella Way, Room 480-O
Office Hrs. M 2-3, W 1-2, Th 3:15-4
petersen@bc.edu, phone 617-552-4550

Texts:

Bodie, Zvi, Kane, Alex, and Marcus, Alan. Essentials of Investment, 5th ed., 2004
Malkiel, Burton. A Random Walk Down Wall Street, 8th ed., 2003.
Lynch, Peter. On Up on Wall Street, 1989.

Course Requirements and Grading:

Two midterm exams (20% apiece), **October 7** and **November 11**
An investment research report (20%), Part I due **October 26** and the
complete report on **December 7**)
A final exam (40%), on Saturday, **December 20**, at 9:00 a.m.)
Problem Sets in the first part of the course (optional but strongly
encouraged) will be recorded for extra credit if done well.

Course Organization and Expectations:

The course works best if pursued as a joint enterprise where the student contributes as much as the instructor. I expect to work hard at the course and I expect as much from you. This means coming to class, reading the assigned materials, working through the problem sets, and raising questions on material you find difficult or confusing. You will find me available outside of class, with sign-up times for appointments posted on my door, and you will find me more than willing to help if you are doing your share as well. I also expect you to read the financial pages of the newspaper, and to generate discussion on current topics as they develop.

You are encouraged to work together on the problem sets if you like, to discuss your investment briefs with each other, and to study together. Your work on exams is to be entirely your own, and on your investment report anything drawn from others or worked out in conjunction with others should be carefully cited. Be sure you are familiar with the section on "Academic Integrity" in the Boston College Catalog (pp. 30-32) and be aware that I take this most seriously.

Good luck. It should be fun.

<u>Topics</u>	<u>Syllabus</u>	<u>Readings*</u>
I. <u>Introduction.</u>		
A. Capital theory and tradeoffs over time.		Malkiel, Chs. 1-4
B. Financial markets and economic efficiency.		Bodie, Ch. 1

*Complete citations to the readings are given below. They may all be found, save for those by Bodie, et al, and Malkiel, on reserve in the O'Neill library or through Quest online reserves. In addition to the readings listed above, Peter Lynch's One Up on Wall Street should be read throughout the course. Pay particular attention to Lynch's One Up on Wall Street in doing your investment report.

Reserve Readings (O'Neill Library or Quest online)

Friedman, Jesse. R&D Intensity in the Pharmaceutical Industry, Jesse J. Friedman and Associates, Washington, D.C., September, 1973.

Kolbert, Elizabeth. "The Last Floor Show: What Will Become of the New York Stock Exchange?" The New Yorker, March 20, 2000, pp. 84-93.

Periodicals and T.V.

The Wall Street Journal, daily, Monday through Friday. Excellent coverage of financial and economic news.

Forbes, biweekly. Perhaps the best of the magazines specializing in finance.

CNBC most of the day for up-to-date market information and for excellent coverage of business and financial news.

Data Sources
