Text: Samuelson, Paul A. and William D. Nordhaus. Economics, 18th ed., 2005

Course Requirements: 2 Mid-Term Exams (20% each)
1 Final Exam (35%), on May 8 (Fri) at 12.30 p.m.
Problem sets (15%)
Class presentation (10%)

Grading: The final grade will be assigned based on the requirements mentioned above with the weights described.

Exams: There will be two mid-terms and one final exam. You will be responsible for the material covered in class and that indicated on the reading list. There will be NO make-up exams. Contact me if you miss an exam and your final grade will be based on the other exam and final.

Problem sets: Working together on problem sets is allowed and encouraged, but make sure you write the answers by yourself. The problem sets will be graded on a check-plus, check, check-minus system. I will send the problem sets and solutions by email.

Class presentation: You will be required to make a group presentation using an article that you come across in the media based on concepts covered in class.

Lectures: There are two lectures per week most weeks, except when holidays intervene. Attendance is required to do well on the exams. You must feel free to stop me with questions during the lecture. If you miss a lecture, you are encouraged to discuss the material with your classmates and then contact me with questions.

Readings: The text reading for each topic is provided below. The text is a useful tool that should be read carefully, preferably before the appropriate lectures.

Integrity: While working together on problem sets is encouraged, working together on exams is forbidden. Please familiarize yourself with the "Academic Integrity" Section of the Boston College Catalog (35-36) or online at <http://www.bc.edu/integrity>.

Syllabus: The schedule below provides an outline of the course and the corresponding reading assignments. As we go along, I will elaborate on which sections we will cover in each lecture.

Syllabus

Topic	Reading
Introduction, Scarcity, Choice and Production Possibility Curve	Chap 1 (A, B, C)
