I have a limited reading list in the belief that less is more in learning economics. I expect to occasionally supplement the reading list with some current material from the flood of media generated data on trade issues, particularly from the Economist. I encourage students to do likewise.

Practice thinking like an economist as you read or listen to popular descriptions of economic affairs; you will enjoy understanding more about the world and become more adept at taking exams in economics. Also, you may impress your friends (though this can easily backfire) and eventually prospective employers or clients.

Memorizing is not a successful strategy in this course; practicing analysis is. **Past experience indicates it is very useful to read the text before the lecture.**

Academic integrity is central to the mission of higher education. Please observe the highest standards of academic integrity in this course. Please review the standards and procedures that are published in the university catalog and on the web, at: (<http://www.bc.edu/offices/stserv/academic/resources/policy/#integrity>). Make sure that the work you submit is in accordance with university policies. If you have any questions, please consult with me. Violations will be reported to the Deans' Office and reviewed by the College's Committee on Academic Integrity. This could result in failure in the course or even more severe sanctions.

Ec 371 Course Requirements:

The first term exam is February 12 (30%). The second term exam is March 26 (30%).

The final exam (40%) will be at the scheduled time. Exams missed without prior consent of instructor (given only in extraordinary circumstances) will be graded "F." I never give makeup exams.

Attendance is required. More than 3 unexcused absences reduce your grade in the course by one step (e.g. B to B-). I take attendance.

Homework assignments and class participation count in determining whether you get the benefit of the doubt.

TEXTBOOK: Paul Krugman and Maurice Obstfeld, International Economics: Theory and Policy 8th Ed., Addison Wesley, 2008.
