

The Graduate Statistical Assistant Program presents

RESEARCH METHODS

*a searchable database of Boston College course offerings
in statistics, methodology, qualitative analysis, and measurement*

accessible via web browser at

<http://fmwww.bc.edu/GStat/RM>

The Research Methods database provides course descriptions, schedules, staffing, and links to web-accessible resources for courses offered throughout the University.

This information will help students seeking a course covering specific concepts, as well as faculty seeking colleagues with expertise in particular methodologies.

The database will be regularly updated and enhanced by the Graduate Statistical Assistants. If you know of a course that should be included, or are an instructor who would like to revise the information provided for your course, please contact your GSA.
