The Graduate Statistical Assistant Program presents

DATA RESOURCES

a searchable database of Boston College statistical datasets
for research and instruction in the social sciences, education,
nursing, management, and social work

accessible via web browser at

http://fmwww.bc.edu/GStat/DR

The Data Resources database provides a growing collection of descriptive information on statistical datasets available to the Boston College community. Most of these datasets are available on line using supported statistical packages such as SPSS, Stata and SAS. A number of datasets are accessible from your web browser, in which you may select the desired series and download them to your desktop in a format compatible with spreadsheets, statistical tools and word processors.

The database will be regularly updated and enhanced by the Graduate Statistical Assistants, in cooperation with Research Services. The database is a joint project of the GSA Program and the University Libraries' Virtual Data Center.

For additional information about the GSA Program and answers to many Frequently Asked Questions about statistical computing and dataset use at Boston College, please visit
